EXAMINER'S AMENDMENT

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 25, 2005 has been entered.

Claim Objections/Observations

In claim 15, line 9, the word "between" should be removed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hüttinger et al. (WO 98/21163).

Hüttinger teaches a CVI process for depositing SiC into a preform (abstract). MTS as the precursor in a hydrogen carrier gas is taught on page 7, lines 6-30. The

Art Unit: 1762

carrier gas is taught to be within the applicant's range (page 15, lines 15-29). The reference discloses pressures within the applicants range (Embodiment 3 and 8). The porosity is within the applicant's range (figure 5; page 5, lines 30-34). The examples teach a process temperature of 1,100 degrees C. Although the reference does not explicitly teach the pre-reacting step, this is a method limitation for a product claim. The product of the instant claim would be patently indistinguishable from the product of the reference. Therefore, the product of the reference reads on claims 13 and 14.

Allowable Subject Matter

Claims 2, 3, 7-12, and 15 would be allowable if rewritten or amended to overcome the objection set forth in this Office Action.

The following is an examiner's statement of reasons for indicating allowable subject matter: The amendment filed August 25, 2005 adds the limitation of pre-reacting the process gas (methyltrichlorosilane in hydrogen) on contact with the surface of the heat-resistant material that is arranged between the gas feed and the fiber scrims of the carbon fiber or silicon carbide fiber preform. Support for this limitation exists on page 5, lines 15-26. This amendment overcomes the prior art of the previous Office Action, as indicated in the Interview Summary filed December 16, 2005. Upon further search and consideration, it has been determined that the prior art fails to teach, or make obvious, this limitation in combination with the other process condition parameters required.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
